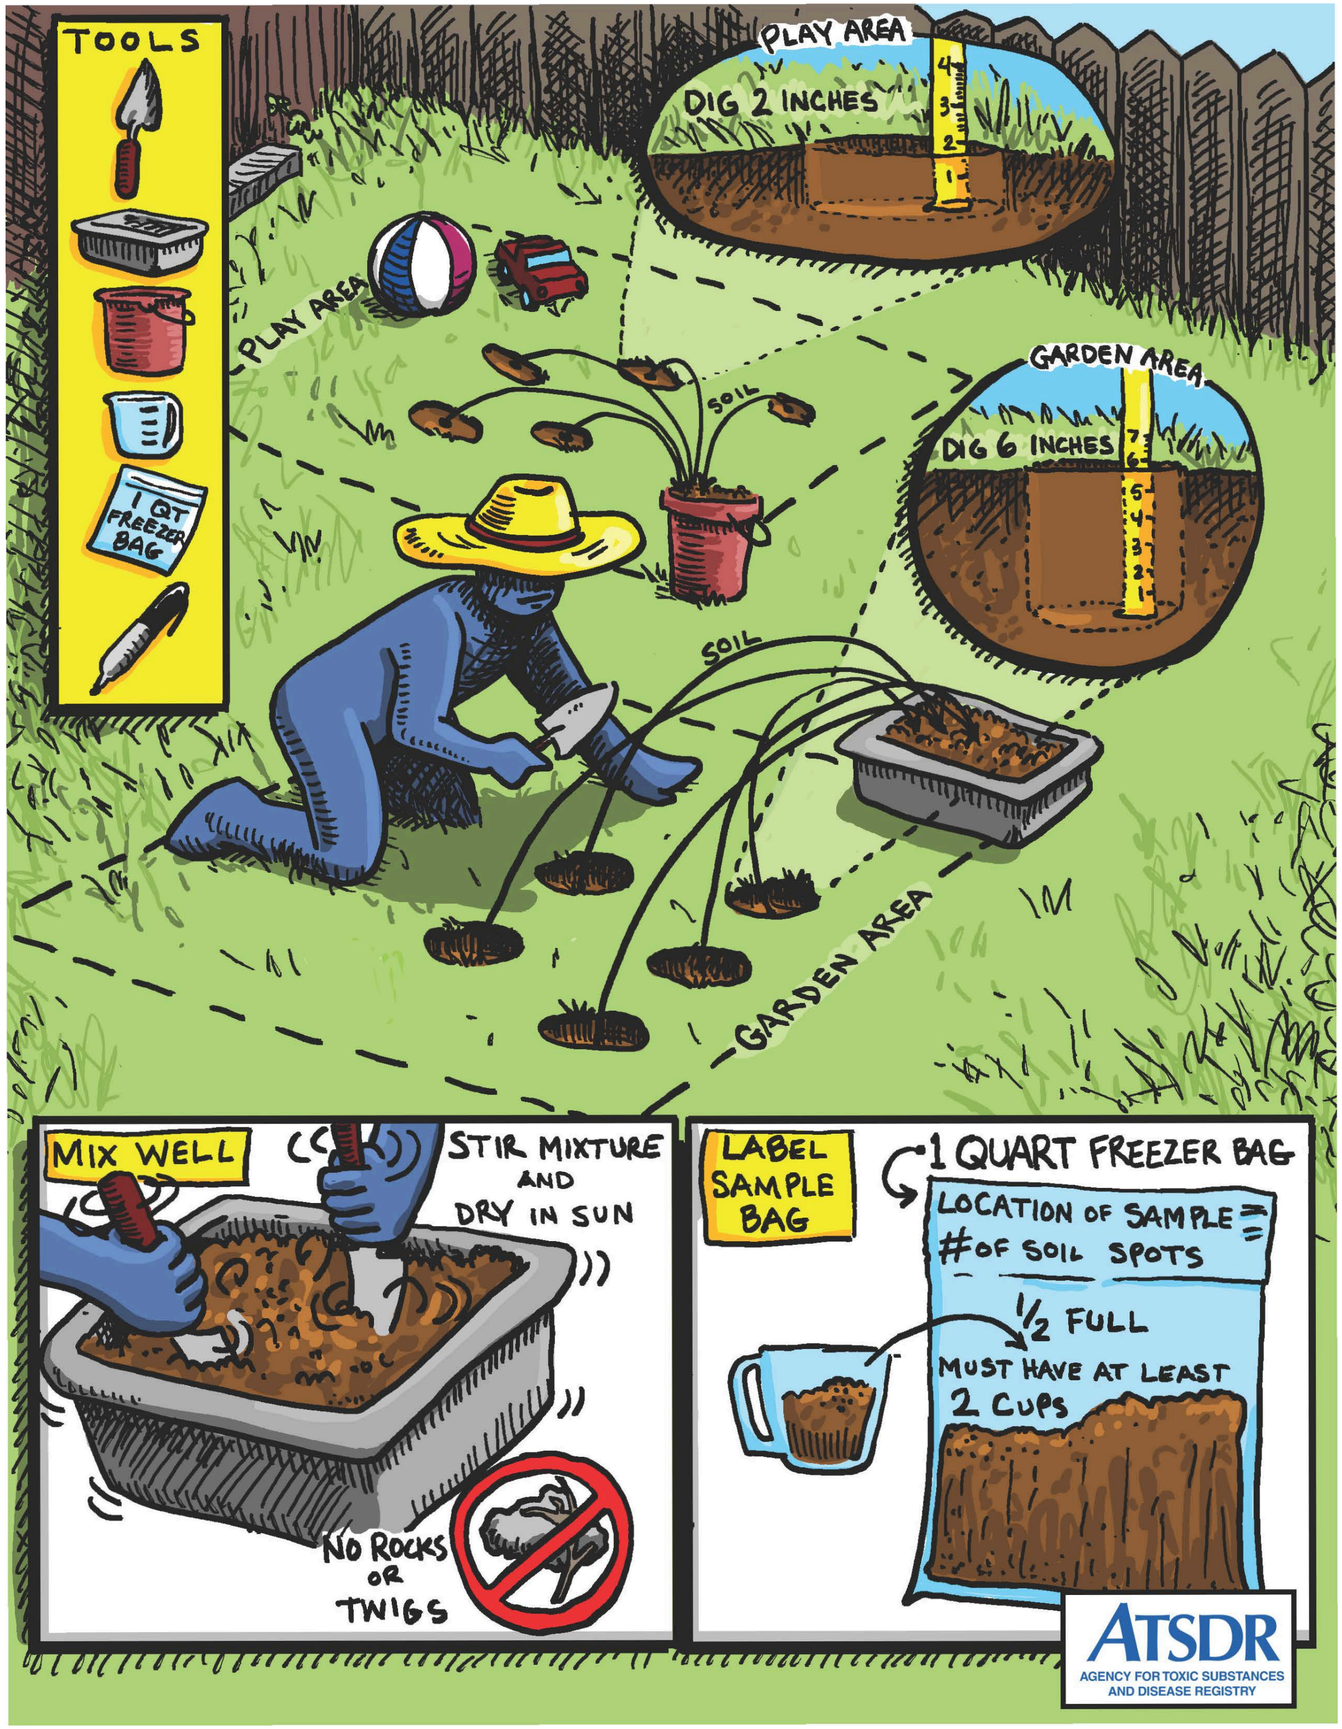
ENGLISH

# HOW TO COLLECT A SOIL SAMPLE



## STEP 1

**Locate an area that has at least 6 inches of soil depth to dig into for the soil sample.**

## STEP 2

**Collect and mix soil well into one clean container.**
For areas less than 500 square feet, collect 3 samples.
For areas more than 500 square feet, collect 5 samples.

## STEP 3

**Remove pebbles, rocks, roots, or debris and air dry the soil.**
**Do NOT use a flame, oven, or hairdryer to dry the soil.**

## STEP 4

**Transfer 1-2 cups of the mixed dry soil into a sealable bag or container.**
